Premier inaugurates Mesob One-Stop Service Center to ameliorate service administration

On **Apr 26, 2025 569**

Addis Ababa, April 26, 2025 (FMC) — In a major step toward modernizing public service delivery, Prime Minister Abiy Ahmed today inaugurated the Mesob One-Stop Service Center in Addis Ababa, alongside senior federal and regional officials.

The Center aims to ease service administration by consolidating multiple government services under one roof, powered by advanced digital technologies.

According to the Office of the Prime Minister, the initiative eliminates the need for citizens to visit different offices, stand in long queues, or manage time-consuming paperwork, offering a fully digital, streamlined system instead.

Twelve federal institutions have joined the pilot phase, now operational, delivering 41 essential public services — including licensing, digital ID registration, and more — from a single location. The participating agencies are:

National ID Ethiopia
Immigration and Citizenship Service
Document Authentication and Registration Service
Ministry of Revenue
Ministry of Trade and Regional Integration
Ministry of Labour and Skills
Ethiopian Investment Commission
Ministry of Foreign Affairs
Educational Assessment and Examination Service
Ethio Post
Commercial Bank of Ethiopia
Ethio Telecom

Each institution also offers integrated digital connectivity to ensure seamless service access.

After touring the facility, Prime Minister Abiy stressed the importance of tackling inefficiencies in service administration.

“Addressing the areas that cause frustration for our citizens in service administration is a priority for us. Today, we inaugurated the Mesob One-Stop Service Center as part of this commitment,” he said.

The Premier pointed to three defining aspects of the Center: the transformation of an outdated building into a modern, attractive environment; the use of locally developed software to unify services; and the training of young professionals to deliver dignified, customer-centered service.

“Twelve institutions have begun offering 40 different services under one roof, enabling citizens to save time and access services more efficiently,” he mentioned.

He further emphasized, “Developing systems like this addresses many of the frustrations our citizens face and, over time, will contribute to greater public satisfaction. Today marks a significant step, and Ethiopia will continue to expand on this pilot to ensure better service delivery for all our citizens.”

Modernized Service Delivery Seen as Key to National Prosperity at Bahir Dar Mesob One-Stop Center Launch

On **Oct 6, 2025 452**

Addis Ababa, October 5, 2025 (FMC) – Ethiopia's Deputy Prime Minister, Temesgen Tiruneh, inaugurated the Bahir Dar Mesob One-Stop Service Center, highlighting the urgent need to modernize public service delivery and strengthen development capacity to achieve the nation's vision of prosperity.

On the occasion, Temesgen explained that a national policy has been formulated and translated into proclamations, regulations, and guidelines to modernize civil service delivery, ensuring that citizens can access superior services quickly and innovatively.

The Bahir Dar center, which operates 52 service windows where 12 institutions provide multiple services in its first phase, is part of a nationwide initiative that began at the federal level under the direction of Prime Minister Abiy Ahmed.

The program is being expanded to all regions, following the success of the initial Mesob One-Stop Center launched in Addis Ababa using domestic resources and skills.

The Deputy Prime Minister noted that Ethiopia has been a pioneer in modern government services and administration, yet it still lags behind other countries in terms of service modernization.

The Mesob One-Stop Center was therefore designed to address these gaps, combining professionals and digital technology to save time and resources while reducing repeated service obstacles.

He stressed the importance of empowering professionals, protecting infrastructure from damage, and ensuring uninterrupted service delivery to the public.

Additionally, bringing government services closer to citizens, particularly at the kebele level, is expected to improve satisfaction and enhance accessibility.

Amhara Regional State Chief Administrator, Arega Kebede, highlighted the importance of the Mesob One-Stop Center as a major institutional reform program aimed at bringing government services closer to the people.

The regional chief administrator confirmed that the initiative would soon expand to Gondar and Dessie and eventually cover other cities across the region.

The center is expected to reduce opportunities for corrupt practices, improve service efficiency, enhance citizens' quality of life, attract investment, and accelerate regional and national development.

Arega Kebede emphasized that serving the people is an obligation for all government institutions and staff, and that employees at the center should act as role models, delivering efficient, high-quality services.

He stressed that institutions should be known for superior service rather than for corrupt practices, and citizens were encouraged to cooperate by reporting and preventing theft and misconduct.

Both federal and regional authorities underscored that the success of the Mesob One-Stop Centers depends on qualified personnel, well-established infrastructure, and a culture of service that prioritizes public satisfaction.

The inauguration of the Bahir Dar center marks a significant step in Ethiopia's ongoing efforts to modernize public service delivery, strengthen governance, and foster sustainable prosperity nationwide, it was emphasized.

Mesob One-Stop Service Center Efficient, Indigenous System Worthy of Emulation: Kenya, Angola Representatives

On **Jun 24, 2025 649**

Addis Ababa, June 24, 2025 (FMC) — Kenya and Angola representatives who attended the 10th Africa Public Service and Administration Conference hosted by Ethiopia have lauded the Mesob Center, describing it as an exemplary model of service delivery organized with indigenous knowledge and modern working practices.

After visiting the center, the representatives said it offers valuable lessons and experiences for other nations.

According to the representatives, the Mesob Center is a prime example of Ethiopia's accelerated efforts to modernize services using homegrown expertise.

Kenya Ports Authority Assistant Operations Officer Winnie Chepkoech Siele, expressed her astonishment at Ethiopia's remarkable reforms in responding to its citizens' service needs.

"Wow, it's amazing; and it's one thing that has really amazed me because of the way they execute their services, the customer service, the way they have digitized everything and also how they have explained their handling customers in a very, very short time."

Kenya has also a one-stop center called Huduma Center, and it's something which has really helped the country to ensure efficient services to the community or to the country within a short time, she added.

Siele said Kenya intends to draw upon the experience and lessons from Ethiopia's Mesob Center to further modernize its Huduma one-stop service centers.

Angola's First Secretary at the Embassy in Ethiopia, Fernando Quiteque Muhongo, stated that the Mesob Center serves as a learning opportunity for numerous countries.

Angola, he said, has gained significant experience from Ethiopia's Mesob Center as it embarks on its journey to streamline government services.

In Angola, we have a Simplify project. It's almost the same thing, and I think that we can learn a lot from Ethiopia. I think it's a very good experience."

Huduma Kenya Director of Communications, Jeferson Nyakamba, praised the indigenous technological knowledge implemented by Ethiopia in its Mesob Center as astonishing.

He also highlighted the significant benefit of the technologies being utilized in providing prompt responses to customer complaints.

“What I like about this Mesob center is the kind of technology they are using is homegrown,” Nyakamba emphasized via ENA.

Africa has a way of getting technologies from outside the country, he added, but since this one has been developed here it is very nice and the technology should be able to improve customer satisfaction like complaints handling, when a customer complaint, technology should be able to help to resolve the complaint.

Senior gov't officials hail Mesob One-Stop Service Center as model for transparent, tech-driven public service

On **May 4, 2025 339**

Addis Ababa, May 3, 2025 (FMC) — The newly inaugurated Mesob One-Stop Service Center is equipped with technologies that enable the provision of transparent and efficient service delivery, high-level government officials asserted.

Deputy Prime Minister Temesgen Tiruneh, along with ministers and leaders of federal institutions, visited the Mesob One-Stop Service Center on Friday.

The officials said the one-stop service center significantly streamlines government services.

Trade and Regional Integration State Minister Yasmin Wohabrebbi stated on the occasion that the government has a responsibility to provide efficient and effective services to citizens.

She added that a key part of the comprehensive macro-economic reform is enabling the private sector to have a significant contribution to the country's economic growth.

For her, modernizing government services through civil service reform is crucial for actively engaging the private sector in the Homegrown Economic Reform.

The Mesob One-Stop Service Center was launched with the support of technology to address grievances of citizens and enhance their participation.

She explained that users can utilize Mesob without hassle, and there are professionals diligently assisting citizens who may not have digital technology knowledge.

Efforts will be made to expand the type and accessibility of the service to other areas in the future, it was learned.

Information Network Security Administration Director-General, Tigist Hamid, stated that Mesob is a center where 12 government institutions provide services.

The 12 federal government agencies are National ID Ethiopia, Immigration and Citizenship Service, Document Authentication and Registration Service, Ministry of Revenue, Ministry of Trade and Regional Integration, Ministry of Labor and Skills, Ethiopian Investment Commission, Ministry of Foreign Affairs, Educational Assessment and Examination Service, Ethio Post, Commercial Bank of Ethiopia, and Ethio Telecom.

She told local news agency ENA that the institutions that used their own service delivery technologies and applications needed security screening when integrated into the Mesob One-Stop Service Center.

Accordingly, she stated that all institutional applications have undergone the necessary security screening and auditing and have been approved.

Tourism State Minister Endegena Abebe described Mesob as a center that can modernize government service delivery and demonstrate Ethiopia's capacity to do so.
She stated that Mesob is a system where users can quickly and efficiently obtain two or. more services at once.

The state minster said the Ministry of Tourism is making the necessary preparations to join the Mesob One-Stop Service Center.

Last week Prime Minister Abiy Ahmed, along with senior federal and regional leadership, inaugurated the Mesob One-Stop Service Center which brings together various government services under one roof by utilizing advanced digital technologies.

The center enables citizens to easily access services of federal institutions through a fully digital system, eliminating the need to visit the offices and face cumbersome paper-based processes.

Somali Region Embraces Digital Transformation with Launch of Mesob One-Stop Service

-

Addis Ababa, December 20, 2025 (ENA) — The Somali Region has officially inaugurated the Mesob One-Stop Service center in Jigjiga, marking a pivotal advancement in the region's commitment to modernizing public administration and enhancing service delivery.

The inauguration ceremony was presided over by Mustafe Mohammed, Chief Administrator of the Somali Region, alongside Aklilu Tadese, State Minister for Cabinet and Sector Oversight in the Prime Minister's Office.

In its initial phase, the Jigjiga center brings together nine government institutions to offer 32 distinct services under a single roof.

The launch signifies the region's commitment to the national "Medemer State" governance philosophy, spearheaded by Prime Minister Abiy Ahmed, which emphasizes institutional synergy and collective efficiency.

By consolidating these functions, the center eliminates the need for citizens to navigate the labyrinth of multiple government offices, saving time and fostering transparency.

The Mesob service—named after the traditional Ethiopian bread basket that symbolizes unity and sharing—is more than just a building; it is a sophisticated integration of human expertise and advanced technology.

The facility is fully equipped with modern digital infrastructure to ensure that services are processed with speed and accuracy, reflecting the modern standards of the digital age.

The rollout of Mesob centers across the country is a direct response to a strategic directive from PM Abiy Ahmed.

During leadership sessions focused on the "Medemer" philosophy, the Prime Minister emphasized the necessity of urban centers adopting unified service delivery models to reduce bureaucratic friction and enhance the dignity of the citizen experience.

This initiative is a cornerstone of Ethiopia's broader digital transformation strategy.

Over the past few years, the nation has invested heavily in digital IDs, e-governance platforms, and telecommunications infrastructure.

The "Mesob" concept serves as the physical manifestation of this digital evolution, ensuring that even as services move online, the physical touchpoints for citizens remain efficient, welcoming, and integrated.

The successful launch in the Somali Region demonstrates a coordinated effort to ensure that the fruits of modernization reach every corner of the nation.

With the first phase now operational, the center is expected to expand its service offerings, further cementing its role as a vital link between the government and the people of the Somali Region.
